### [If Sufficient Make the Way Passable](#)

LAMA SING: The great cycles – and the Wave of Light that is the combined expression of the seven previous great Waves – now provides a pathway for the Homeland to express itself within the group thought. The requirement (taken colloquially, mind you) is that there are sufficient of those within the group thought who would choose it, so as to not violate the right of the Law and the right of freewill choice.

If sufficient make the way open and passable, the Promise will be fulfilled and the Master will be evidenced in and about the Earth in the manner as has been prophesied ... This will occur as prophesied. Whether or not those who are His and those who choose are sufficient to manifest within the group-thought will decide the outcome in accordance with the questions that you have asked ... and that are underlying your question, as well.

So, let us see, now, if we can be a bit more concise to your question ...

The potential is now awakened within the finiteness of the Earth. It is touching those spirits who are seeking it. As more and more of those who are His and those who choose claim, then, the greater shall be the manifestation. In other words, the path shall be made open and passable for the greater glory of the Homeland to be brought forth from within the spirits of those who are presently within the group thought or mass-mind thought in finiteness in Earth ... and also to include those who are not in finiteness but who are within the Earth, itself (as a realm ,that is; not within the *mantle* of the Earth). 20130202
