Dear Voyagers,

Comments are beginning to come in regarding the first experiences of the project and I must admit that the first week had a few surprises for me, some which I had not anticipated in any way. I am in the process of preparing the first report on these, and as soon as I have this mailing off to you, I will return to work on the report and hopefully have it in the mail to you within a few days.

A few of you have sent in questions which I believe you will find answered in the most recent Voyager reading. If after hearing the tape you still need help with those questions, let me know. This latest reading is code #V-105, and it is enclosed in this mailing. As in the past, I suggest that you listen to the tape immediately as it contains pertinent information about our next activities with the Full Moon exercise.

The materials enclosed in this mailing are:

1. Cassette tape of reading #V-105, recorded on both sides.
2. Transcript of reading #V-103.
3. Transcript of reading #V-104.

Remember to keep a journal of the events that are occurring for you, especially noting exceptional contrasts in your meditations. It appears that such contrasts have been a common occurrence for a number of us, and I would be interested to know how many are experiencing meditations of this nature. Also remember to write down your dreams as well. There already have been several situations I know of where material has "fit together", apparently being given in pieces to several members.

Many Blessings,

Al Miner
