Dear Voyagers,

I found it interesting that reading #V105 contained answers to questions that I hadn't even received yet. In spite of "their" obvious ability to do such Works, I commented on some of these questions anyway just to add another perspective.

I can't speak highly enough of the achievements that have been reported, and of the potential value that these offer to us all. As you will see when you read through the 1st Report, there are a number of techniques reported that are very worthy of any time you might spend on experimenting with them. Please do try them if you haven't already, or if it's been some time since you have. I was personally surprised at how many of these little techniques I had forgotten about. I have already tried several, finding them to be very helpful, and then wondered why I had let them slip away. Here again the value of keeping a journal and periodically reviewing it becomes impressively evident.

A few words about the structure of the Project as revealed in V-105. The three segments of the Project; physical, mental and spiritual now seem amazingly clear and logical. To correlate these basic elements of expression with the lunar cycles adds a dimension I had never considered, and look forward to with great interest and anticipation. My suspicion is that by the time we have reached the third segment, the spiritual, the true scope of the Voyager Project will unveil itself as magnificent.

In this mailing you will find the following items:

1. The transcript of reading #V-105.
2. The first Voyager Report containing your questions and comments, and my suggestions.

Please read over the transcript for guidance on this second segment, the mental. Also remember to read Report #1 and try some of the suggestions you'll find there. Report #2 is already in process as are several group experiments. Reading #V-106 will also be coming shortly.....so don't put off trying some of the suggestions in Report #1 while you have time.

Many Blessings,

Carl M. Hill
