

Evaluation of Planetary Placements for February 9, 1986
in relationship to Project VOYAGER

The psychological, sociological and probable manifestations of the Sun/Moon/Mercury/Venus/Jupiter conjunct in Aquarius, in relationship to the project "Voyager" are:

The Sun, Moon, Jupiter, Mercury and Venus will be in Aquarius, the great humanitarian sign. In addition, Halley's Comet will transit this orbit. Although there is not much recorded information on comets, it is generally believed that when transiting the paths of two or more planets, the vibrations from the comet increase and tie together the vibrations of the planets being transited. The overwhelming implications of the placement of this many planets in Aquarius with relationship to the beginning of a project intended to benefit humanity, is extraordinary. The sign of Aquarius does not deal with individuals but with humanity as a whole.

The Sun in Aquarius represents good powers of observation, intuitive understanding of other persons, adaptability, readiness to help others, knowledge of human nature and sympathetic attitudes toward unique and new projects, great love, desire and drive to help others.

The psychological and sociological implications of this placement are for working toward an objective, abilities to make decisions based on impersonal yet humane thinking.

The Moon in Aquarius brings waves of new ideas, the ability to change, readiness to help other and an abundance of thought and effort manifesting in the realization of hopes and wishes.

The psychological and sociological implications of this placement are changeableness, adaptability and good memory.

Mercury in Aquarius brings indicators of progressive thinking, quick grasp of situations, individual and original judgment and the ability to increase and enlargement of the imagination.

The psychological and sociological indicators are for the ability to grasp and understand subjects, good judgment and on an overall basis represents groups of intellectual workers united for a common cause.
